MANCHIDI MAGASENG JOHN

Johannesburg, Gauteng, South Africa
johnmanchidi@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Analytical and detail-oriented Computer Science Honours graduate with a strong background in data analysis, statistics, SQL, Python, Microsoft Excel, and database management. Experienced in transforming raw data into meaningful reports through academic and project-based work. Skilled at analysing trends, validating data, creating dashboards, and presenting insights to support decision-making. Passionate about using data to improve business performance and eager to contribute to a fast-paced sales and manufacturing environment.

SKILLS

Technical Skills

Data Analysis & Reporting

- Microsoft Excel (Pivot Tables, Pivot Charts, Lookup Functions, Data Cleaning)
- SQL
- Data Analysis
- Data Validation
- Data Visualization
- Dashboard Reporting
- Trend Analysis
- KPI Reporting

Databases

- MySQL
- PostgreSQL
- Database Design
- Query Optimisation

Programming

- Python
- SQL
- Basic JavaScript

Business Intelligence

- Basic Power BI
- Data Reporting
- Business Analytics

Operating Systems

- Microsoft Windows
- Linux

Other Tools

- Git
- GitHub
- VMware
- VirtualBox
- Microsoft Word
- Microsoft PowerPoint
- Microsoft Outlook

Core Competencies

- Sales Data Analysis
- Microsoft Excel Reporting
- SQL Reporting
- Data Cleaning
- Data Validation
- Dashboard Development
- Trend Analysis
- KPI Monitoring
- Business Reporting
- Data Interpretation
- Analytical Thinking
- Attention to Detail
- Problem Solving
- Communication
- Team Collaboration
- Time Management

PROFESSIONAL EDUCATION

National Senior Certificate (Matric) Letebele Secondary School
Specialization: NSC

Year Completed: 2019

Bachelor of Science in Mathematical Sciences
Specialization: Computer Science and Statistics
Year Completed: 2024 University of Limpopo

- Key focus areas: Algorithms | Data Structures | Computer Architecture | Computer Networks | Database Systems | Linear Algebra | Advanced Calculus | Regression Analysis | Time Series Analysis | Experimental Design | Sampling Theory | Operating Systems | Artificial Intelligence

Bachelor of Science Honours in Computer Science
Specialization: Computer Science
Year Completed: 2025 University of Limpopo

- Key focus areas: Advanced Database | Advanced Computer Network | Cybersecurity | Research Project | Advanced Operating System

PROJECTS

Intrusion Detection & Prevention System (IDS/IPS) Configuration *University of Limpopo | Jan 2025 - Oct 2025*

- Configured and monitored IDS/IPS tools to analyse network traffic.
- Conducted log analysis to identify system vulnerabilities and security risks.
- Produced reports and recommendations for system improvements.
- Enhanced understanding of cybersecurity and ICT infrastructure.

Cybersecurity HomeLab (Virtual Enterprise Security Environment) *University of Limpopo | Jan 2025 - Jun 2025*

- Built and maintained a virtual enterprise ICT environment using VMware and VirtualBox.
- Configured and managed Linux-based virtual machines.
- Performed system monitoring and troubleshooting activities.
- Investigated network and system performance issues.
- Documented configurations and technical procedures.

Secure Backend Database System (Python, MySQL, PostgreSQL) *University of Limpopo | Jan 2025 - Jun 2025*

- Designed relational databases using MySQL and PostgreSQL.
- Developed SQL queries to extract, summarise and analyse business data.
- Performed data validation and integrity testing.
- Produced technical documentation and reporting outputs.

Statistical Modelling & Data Analysis Project *University of Limpopo (Group Project) | Jun 2023 - Oct 2023*

- Analysed datasets using statistical and analytical techniques.
- Developed reports and visualizations to support decision-making.
- Performed data cleaning, validation, and transformation activities.
- Presented findings and recommendations to project stakeholders.

Application Development Project *University of Limpopo | Jan 2023 - Oct 2023*

- Worked collaboratively to develop and test software solutions.
- Investigated issues through data analysis and troubleshooting.
- Assisted with documentation and system improvements.

Database Management System Project *University of Limpopo | Jan 2023 - Jun 2023*

- Built efficient SQL database structures.
- Optimised SQL queries for improved reporting performance.
- Created reports supporting business information requirements.

RELEVANT CERTIFICATION AND SHORT COURSES

- Cisco Cybersecurity Essentials – Cisco Networking Academy
- Cisco Data Science Essentials – Cisco Networking Academy
- Centre for High Performance Computing (CHPC) Programme – NITheCS
